1 Motivation

Current problem

Relevance of the problem

Hole in the literature / previous limitations

2 Idea

Main Idea

Innovation

3 Methodology

Modeling

Algorithm 1: Hello world

```python
import numpy as np

def hello():
    print("Ahora si con colores")

hello()
```

Assumptions

Architecture

4 Experiments

Environments and datasets

Baselines

Settings

5 Results

Good and bad performance in different scenarios

6 Critical Discussion

Strength

Weakness

Questionable assumptions

What it is not clear

7 Conclusions

Personal opinion

¿Is it a good contribution?

¿Would I use it on my investigation?
